Is Your Supply Chain Planning Helping You Scale – or Slowing You Down?

WHY DMS?

Proven methodologies that deliver tangible results in 6 months.

No fluff, no overcomplication - just actionable insights.

Backed by industry experts with real-world transformation success.

WHY CHOOSE DMS PLANNING AUDIT

A structured, objective review of your supply chain planning requirements and technology

Clear visibility into gaps between business needs and technology capabilities

Enables smarter decision-making before investing in new tools

Consultant-driven insights with practical, actionable recommendations

SUPPLY CHAIN PLANNING AUDIT

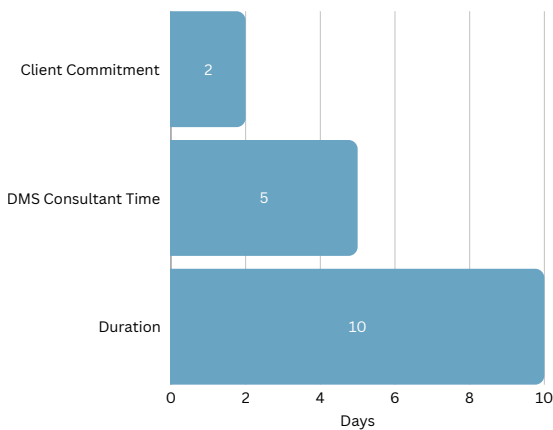

In today's fast-moving environment, relying on gut feel, disconnected spreadsheets, or outdated systems can quietly erode margins and performance.

The DMS Planning Audit removes the uncertainty by giving you clear, data-backed visibility into how your planning function is really performing.

No assumptions. No wasted effort.

Just a focused, consultant-led evaluation that pinpoints inefficiencies, exposes risks, and reveals practical opportunities for improvement. It's a low-risk, high-impact way to assess where you stand - before making larger investments in systems, tools, or process change. In just two weeks, you'll gain the clarity to make confident, forward-looking decisions that drive measurable value.

ENGAGEMENT STRUCTURE

Eliminate Guesswork.
Minimise Risk.
Maximise Impact.

In just two weeks, gain the clarity to reduce risk, close planning gaps, and make smarter, faster decisions.

About DMS

For over 38 years, DMS has led more than 350 supply chain transformations for 275 clients across 19 countries - driving innovation and impact throughout the Asia-Pacific region.

Renowned as a global frontrunner in Supply Chain Transformation, DMS brings unparalleled expertise in advanced supply chain technology and consulting services, empowering businesses to streamline operations and achieve sustainable success.

Whether your supply chain is in its emerging stages with limited maturity or a well-established system with mature data and processes, DMS delivers adaptable solutions that align with your unique business goals and supply chain objectives.
